01

ALLERGY

Allergy & Antihistamines

Bilastine — a second-generation, non-sedating antihistamine offered in adult and child-friendly orodispersible forms for rhinoconjunctivitis and urticaria.

PACK 10 Tablets **MRP** Rs. 349.50

ALLERGY

Bilstin 20 mg

Bilastine 20 mg — film-coated tablet

Second-generation non-sedating H₁-antihistamine

COMPOSITION

Each film-coated tablet contains Bilastine 20 mg.

INDICATIONS

Symptomatic treatment of seasonal and perennial allergic rhinoconjunctivitis (sneezing, rhinorrhoea, nasal & ocular itch) and of urticaria in adults and adolescents.

DOSAGE & ADMINISTRATION

- Adults & adolescents ≥ 12 years: 20 mg once daily
- Take on an empty stomach — 1 hour before or 2 hours after food or fruit juice
- Provides 24-hour symptom control

Non-sedating · Cardiac-safe · Few interactions · 24-hour cover

PACK 10 ODT MRP Rs. 299.50

ALLERGY • PAEDIATRIC

Bilstin 10 mg ODT

Bilastine 10 mg — orodispersible tablet

Paediatric non-sedating H₁-antihistamine

COMPOSITION

Each orodispersible tablet contains Bilastine 10 mg; dissolves on the tongue — no water required.

INDICATIONS

Symptomatic treatment of allergic rhinoconjunctivitis and urticaria in children, in a melt-in-mouth form designed for easy dosing.

DOSAGE & ADMINISTRATION

- Children 6–11 years (body weight $\geq$ 20 kg): 10 mg once daily
- Place on the tongue; allow to disperse, then swallow
- Take on an empty stomach for best absorption

Melt-in-mouth • Keeps kids alert • Cardiac-safe • Once daily

Why Bilastine — the Clinical Edge

A modern antihistamine profile that supports adherence and daytime function

Non-sedating

Negligible CNS penetration; preserves daytime alertness and concentration.

Cardiac-safe

No clinically significant QT prolongation at the therapeutic dose.

Low interaction risk

Not metabolised by CYP450 — excreted largely unchanged in the body.

No dose adjustment

No adjustment required in renal or hepatic impairment.

24-hour control

Convenient once-daily dosing across the full day.

Rapid onset

Meaningful symptom relief within approximately one hour.

DOSING Adults & ≥12 yrs: 20 mg OD (tablet) • Children 6–11 yrs ≥20 kg: 10 mg OD (ODT) • *Take on an empty stomach*

02

GASTROENTEROLOGY

Gastroenterology

From potent acid suppression to gentle, natural digestive support — a pairing that covers both prescription acid-related disease and everyday gastric comfort.

GASTROENTEROLOGY

Lanozip 30 mg

Lansoprazole 30 mg — delayed-release capsule

Proton-pump inhibitor (PPI)

COMPOSITION

Each delayed-release capsule contains Lansoprazole 30 mg (enteric-coated granules).

INDICATIONS

GERD and erosive oesophagitis; duodenal and gastric ulcer; H. pylori eradication (in combination); NSAID-associated ulcer; and hypersecretory states (e.g. Zollinger-Ellison syndrome).

DOSAGE & ADMINISTRATION

- Usual dose: 30 mg once daily, before breakfast (15–30 min before food)
- Swallow whole; do not crush or chew
- Duration according to indication and clinical response

Potent acid control · 24-h suppression · Aids mucosal healing · Fast symptom relief

PACK 14 Capsules MRP Rs. 399.50

PACK 120 ml **MRP** Rs. 274.50

GASTROENTEROLOGY

GOTEK Syrup

Dextrin · Fennel · Ginger · Fenugreek · Peppermint

Natural digestive & antacid support — dietary supplement

COMPOSITION

Per 10 ml: Dextrin 1000 mg, Fennel Oil 100 mg, Powdered Ginger 30 mg, Fenugreek Seed Extract 50 mg, Mentha piperita 140 mg.

INDICATIONS

Natural support for bloating and gas, indigestion and acidity; speeds up digestion. Added dietary-fibre (dextrin) offers a prebiotic benefit for overall gut comfort.

DOSAGE & ADMINISTRATION

- Adults: 2 teaspoons three times daily
- Children: 1 teaspoon three times daily
- Or as directed by the physician · shake well before use

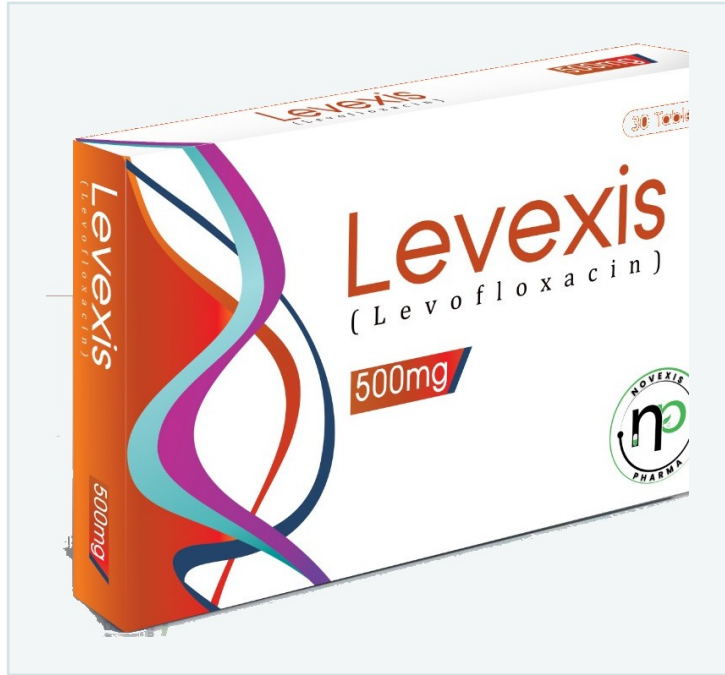

Herbal blend · Prebiotic fibre · Eases gas · Gut comfort

03

ANTI-INFECTIVES

Anti-Infectives

Levofloxacin — a once-daily respiratory fluoroquinolone with near-complete oral bioavailability, available in two strengths to match the indication.

250 mg

30 Tabs • Rs. 329.50

500 mg

30 Tabs • Rs. 499.50

ANTI-INFECTIVE

Levexis

Levofloxacin 250 mg & 500 mg — film-coated tablets

Respiratory fluoroquinolone • broad-spectrum bactericidal

SPECTRUM & INDICATIONS

Active against Gram-positive, Gram-negative and atypical pathogens. Indicated in community-acquired pneumonia, acute bacterial sinusitis, acute exacerbation of chronic bronchitis, complicated & uncomplicated UTI, acute pyelonephritis, skin & soft-tissue infections and chronic bacterial prostatitis.

Once daily • ~99% oral bioavailability • Respiratory cover

TYPICAL ONCE-DAILY DOSING BY INDICATION

Indication	Strength	Duration	Indication	Strength	Duration
Uncomplicated UTI	250 mg	3 days	Comm.-acq. pneumonia	500 mg	7–14 days
Acute pyelonephritis	250 mg	7–10 days	Acute sinusitis	500 mg	10–14 days
AECB	500 mg	7 days	Skin & soft tissue	500 mg	7–14 days

Doses are label-typical and indicative only; prescribe per culture/sensitivity and current antimicrobial-stewardship guidance. Class cautions: tendinopathy, QT prolongation, CNS effects and dysglycaemia — refer to full leaflet.

04

PAEDIATRIC WELLNESS

Paediatric Wellness

Pleasant-flavoured drops for the youngest patients — vitamin support for growth and immunity, and gentle carminative relief for infant colic.
